

## PRESENT TEAM STORIES IN CLASS

### AIM:

To practice effective communication and presentation skills by sharing team stories with classmates.

### STORY:

**Title:** Indru Netru Naalai

Indru Netru Naalai (2015) is a science fiction comedy film that revolves around time travel, and it mixes humor with some intriguing concepts about how time and our choices impact the future.

### Main Characters:

- **Ravi** (played by Vishnu Vishal): A young, carefree man who is passionate about science. He's ambitious and dreams of doing something great but is often caught up in small, personal issues.
- **Kumar** (played by Karunakaran): Ravi's funny and loyal best friend, who is always there to support him, even if it means getting into trouble.
- **Sujatha** (played by Miya): A key character in the film who plays an important role in Ravi's life, both as a romantic interest and someone who influences his decisions.

### Story Overview:

The film begins with Ravi and Kumar leading simple lives in Chennai, mostly indulging in everyday struggles and small-time hustles. Ravi, with his interest in science, gets a rare opportunity when he stumbles upon a time machine, an invention that was originally built by his future self.

The time machine is a device that can transport its users to the past or future, and Ravi is naturally intrigued. The duo begins to experiment with it, traveling to different time periods, but with little regard for the consequences of their actions. They initially use it for trivial purposes like gambling, fixing small mistakes in their lives, and avoiding getting caught in awkward situations.

However, their seemingly harmless antics lead to disastrous effects on the timeline. This is when the real conflict starts: the future begins to change in unforeseen ways, and Ravi's actions start to have dangerous ripple effects on not just his own life but the lives of others too.

**The Twist:**

As the story progresses, they discover that the time machine was built by an older version of Ravi, who had come back from the future. The older Ravi's mission is to prevent a catastrophic event that could threaten the future of humanity. However, things get complicated as the trio struggles to correct their mistakes.

The real turning point in the film is when they realize that the time machine, which they thought they could control, is actually affecting the very fabric of time. Ravi and his friends face the pressure of fixing everything they've disrupted before the future collapses completely. This leads to a series of thrilling and humorous situations where they race against time—literally!

**The Conclusion:**

In the end, after many hilarious and intense moments, Ravi and his friends manage to undo the damage they've done, restoring the timeline and saving the future. Ravi learns an important lesson about how every decision we make, no matter how small, can have lasting consequences. The movie ends on a positive note, with Ravi and his friends returning to their normal lives, but now with a deeper understanding of responsibility, friendship, and the importance of their choices.

The film also plays with the theme of fate versus free will—whether we are bound to follow a pre-determined path or if our actions have the power to change the course of history.

**RESULT:**

Presenting team stories in class provides valuable practice in public speaking, storytelling, and communication strategies was successfully done.
